

Only one oil filter is as natural as the energy you produce

Just as organic olive oil is healthy for your body, clean & dry oil is essential for your wind turbine. Choose nature's best olive oil for yourself, and choose the leading offline oil filtration system for your gearbox & pitch hydraulic system - your natural solution.

Your natural solution

Clean & dry oil is the key to reliable wind turbine operation, and C.C.JENSEN is the global leader in oil filtration. We use 100% natural cellulose fibers from sustainable resources: No metal, no plastics, and no chemicals.

- High efficiency removing small particles
- Highest dirt capacity
- Extended oil and components lifetime

Protect your investment with nature's best

The importance of clean & dry oil cannot be overstated. Increase the reliability and lifetime of your gearbox & pitch hydraulic with clean & dry oil:

- Maximized output
- Reduced downtime
- Reduced O&M costs
- Optimized ROI

Protect your body

Remember, it's not just your gearbox & pitch that can benefit from nature's best; extra virgin olive oil contributes to the operational health of your body and is high in protective antioxidants and vitamins.

Visit www.cjc.dk to find out how we can help reduce O&M costs, increase the reliability & lifetime of your equipment, and the lifetime of your oil.
